

FILLMASTER R18

PRODUCT DESCRIPTION

The Fillmaster R18 is a counter pressure filler for beverages containing CO₂. It has 18 stations: In the outer six stations the bottles are rinsed with water before filling. Filling takes place in the rear six stations, and the six middle stations seal the bottles with crown caps (optionally ø26mm or ø29mm).

The bottles are filled under CO₂ back pressure of up to 3 bar. A built-in vacuum pump automatically pre-evacuates the bottles. In order to be able to control the filling process better, the bottles are illuminated with LED lamps. The filling process is automatically stopped by the control system when the target value is reached. All process-relevant parameters can be set via the control system, which guarantees reliable reproducibility of all parameters during the entire filling process.

The Fillmaster R18 is equipped with high-quality steering rollers, so that it can be moved.

It can be used to fill bottles (0.25 l to 0.75 l).

The filling speed can be adjusted continuously from 0.5 to 2 l/min by means of a throttle.

About 700 bottles of 0.5l can be rinsed, filled and corked per hour.

PRODUCT DATA

DIMENSIONS H/W/D: 1910/870/930MM

WEIGHT: 380KG

FILLING SPEED: 0,5 TO 2L/MIN

CO₂ OPERATING PRESSURE: MAX. 3BAR

OPERATING PRESSURE: 6 TO 8BAR

ELECTRICAL DATA: 230V 16A

SCOPE OF DELIVERY

SIX BOTTLE HOLDERS AS DESIRED

CONNECTION ACCESSORIES FOR KEG TAP HEAD OR FERMENTATION TANK

POWER SUPPLY 12V 11A

AVAILABLE ACCESSORIES

CONVERSION SET FILLMASTER RS18 (AUTOMATIC CROWN CORK FEEDER)

FOUR FOOT EXTENSIONS
