

## FILLING HEAD FOR DRILL RIGS

### PRODUCT DESCRIPTION

The filling head is suitable for building your own filling equipment. It fits into standard 43mm drill stands. It can be used to fill clip-on bottles, crown cap bottles, siphons (2l) and party kegs (5l).

About 30 bottles of 0.5l can be filled per hour.  
The filling head is made entirely of high-quality stainless steel and is easy to clean.

The filling tube length is 250mm as standard and may have to be shortened for the respective bottle height. Alternatively, the desired length can be specified when ordering.

### PRODUCT DATA
