

## KORKFIX U

### PRODUCT DESCRIPTION

With our corker beer and other beverages in 0,33l and 0,5l glass bottles with crown caps of 26mm or 29mm diameter can be closed.

The crown cap is inserted by hand and held in place by a magnet on the corking head. Shortly before capping, the beverage is frothed up by an ultrasonic impulse and the air in the bottle neck is pressed out. The head then uses a cylinder to press the crown cap onto the mouth of the bottle, thus sealing it. For reasons of safety, the corker has two-hand operation by means of two push-buttons, one on the right and one on the left of the housing.

### PRODUCT DATA

DIMENSIONS H/W/D: 780/260/290MM

WEIGHT: 18KG

CO<sub>2</sub> OPERATING PRESSURE: 1.5 TO 3BAR

OPERATING PRESSURE: MAX. 8BAR

### SCOPE OF DELIVERY

ONE BOTTLE HOLDER AS DESIRED
