## PRODUCT DESCRIPTION

Our semi-automatic Butterfly R3 labels bottles using the wet glue method. It has three different stations: Picking up the labels, applying the adhesive to the label and attaching the label to the bottle.  
The stations work simultaneously, after which the arms move to the next station by means of a rotary motion. To ensure that the edges of the labels adhere securely, they are additionally pressed on to the right and left of the bottle by one sponge or silicon piece each.

Sensors prevent the Butterfly from working if no bottle or no labels have been inserted in the holder.  
The Butterfly can be easily converted to different bottle types and is always ready for use thanks to the sealable glue container.

It can be used to label cylindrical bottles of various sizes made of plastic or glass. The label width must not exceed half the circumference of the bottle.

Approx. 500 labels can be applied per hour with a fast working method.

## PRODUCT DATA

DIMENSIONS H/W/D: APPROX. 1300x600x500MM  
WEIGHT: APPROX. 50KG  
OPERATING PRESSURE: 6 TO 8BAR  
ELECTRICAL DATA: 230V 600W

## SCOPE OF DELIVERY

MOBILE TABLE ON WHICH THE BUTTERFLY IS PRE-ASSEMBLED  
  
TWO PRESSURE SPONGES OR SILICONS
