PRODUCT DESCRIPTION

With our hop rocket it is possible to upgrade finished beer in fermentation tanks with hop cones or pellets.

The hop rocket is first filled with hops, then closed and connected to the fermentation tank via a pump (not included in the scope of delivery). Cold hopping takes place through the circulation of the beer. A built-in filter retains larger particles.

PRODUCT DATA

DIMENSIONS \varnothing /H: 700/1500MM

WEIGHT: 40KG

CO₂ OPERATING PRESSURE: MAX. 1.5BAR

CONNECTION TAP HEAD: 5/8"

HOP QUANTITY: MAX. 5 KG PELLETS
